Wheatgrass

1 oz. \$1.50 | 2 oz. \$2.75

Wheatgrass is simply the young grass shoots of the red winter wheatberry. Due to its fibrous nature, wheatgrass is indigestible to humans, which is why we juice the grass.

Wheatgrass contains at least trace amounts of every amino acid, vitamin, and mineral necessary for human nutrition, making it one of the few actual "whole foods." Wheatgrass is so nutrient-rich, in fact, that one ounce of fresh wheatgrass juice is equivalent in nutritional value to 2.5 pounds of vegetables. Ounce for ounce, it has more vitamin C than oranges and twice the vitamin A of carrots. Wheatgrass juice is also 70% chlorophyll, which works to increase the body's resistance to illness and aids in the natural cleansing process. Wheatgrass also contains enzymes which help in the digestion and metabolization of nutrients, and abscisic acid, which is known for its anti-tumor activity. Wheatgrass is quite simply one of the healthiest things you can put in your body. Please see our in-store literature for a comprehensive discussion of the amazing health benefits of wheatgrass.
